

Remarks

Claim 1 has been amended to recite:

removing the electronic data from the storage device after the electronic data has been completely transmitted to the e-mail server;

determining if the electronic data is present on the storage device after the interruption in electrical power; and

if the electronic data is determined to be present on the storage device after the interruption in electrical power, resuming the transmission of the electronic data to the e-mail server or restarting the transmission of the electronic data to the e-mail server.

Similar amendments have been made to Claims 8 and 13. Support for the amendments may be found in the Specification at page 4, line 26 through page 5, line 21.

There is nothing in Toyoda 6229884 and Rigaldies 6792085 taken along or in combination that teach or suggest determining if certain electronic data is present on a storage device after an interruption in electrical power and then resuming or restarting the transmission of the electronic data if the electronic data is determined to be present on the storage device after the interruption in electrical power.

Respectfully submitted,

Steven R. Ormiston
